GREY WATER SYSTEM

WATER C  NSERVATION SYSTEMS

Safe, clean, low maintenance and reliable systems that meet even the most stringent environmental health and safety requirements.

Multiple award winning, state of the art, world patented tankless systems, known as the “Clean grey water diversion system”.

Robust, reliable, proven technology.

“Why throw out the water you have just paid for and buy fresh water to water your gardens?”

Gflow System - Robust & Reliable.

Innovative Gflow System -
The simple, economical, easy to install grey water system to keep your garden green.

Using water from the washing machine and bathrooms, the Gflow automatically diverts, filters and disperses the water to the garden via a state of the art GF Drip line irrigation system. No need to ever move a sprayer around the garden again!

Dimensions: H 320mm x L 610mm x W 280mm

The Manufacturer has spent over 8 years developing a safe, clean, low maintenance, robust and reliable technology that meets the most stringent environmental health and safety requirements.

The thermally protected vortex pump as well as the side mounted, clog resistant float switch have both been specifically designed for grey water use, ensuring trouble free watering.

The Gflow system is the only grey water system on the market with both Smart WaterMark & WaterWise certification.

Why choose a Gflow system?

- ÿ Affordable to buy, economical to run
- ÿ Robust & reliable, plug & play, compact, automated design
- ÿ East to install (Can be installed above ground, partially buried or even wall mounted)
- ÿ Hygienic & low maintenance. (Every 3 - 6 months)
- ÿ No foul or unpleasant odours (when used with a GF Drip line system)
- ÿ Easy to pull out sludge trap basket
- ÿ Extra large graded filter
- ÿ Innovative, fail safe, self drain & auto de-sludge mechanism
- ÿ Specially designed, thermally protected vortex pump.
- ÿ Specially designed, side mounted clog resistant float switch
- ÿ 3 Way manual valve to isolate the system when not required
- ÿ Smart WaterMark & Waterwise certified.
- ÿ Can convert a hand moved single outlet hose to a multiple (up to 6 station) watering zone when used with a GF Rotor
- ÿ No need to ever move sprinkler around the garden again

The Gflow system - a multi purpose automatic pump station.

The Gflow also can be used as a water transfer pump station and a drainage transfer
Transfer Pump Station

Water transfer Station

When every drop counts. Harvest and re-direct rainfall and aircon water to:

- ÿ A rainwater tank
- ÿ Fruit trees/gardens
- ÿ Swimming pool top up

Drainage Transfer Pump Station

Get rid of unwanted floor water.

GF Drip Line & Rotor (irrigation controller)

GF Drip-line Kits

State of the art drip-line specifically designed for use with the Gflow and GreyFlow water diverter systems.

The GF drip-line system delivers a slow and precise flow of grey water, irrigating the garden.

GF Rotor

The GF Rotor (grey water diversion system irrigation controller) operates evenly and sequentially up to 6 watering zones.

Advantages of GF Drip-line:

- High flow 8L/hr dripper
- Made from flexible polyethylene tubing
- Simple to install
- Can be used in all shapes and sizes of gardens
- Designed for both sub-surface and sub-mulch applications
- Evenly spaced, pre inserted emitters
- 0.3m Spacing for more effective strip watering
- Self cleaning turbulent flow path

Advantages of GF Rotor

- Hydraulic operation, so no external power required
- Flow activated so the unit will operate from a gravity fed tank with less than 1m head pressure
- Improves performance of a system by splitting the flows and increasing the operating pressure
- Simple and reliable
- Easy to install and operate

Two year warranty

Saving water
